<sup>1</sup> *Petition of the North American Electric Reliability Corporation for Approval of Proposed Interpretation to BAL-002-1*, Docket No. RM13-6-000 (filed Feb. 12, 2013).

## II. SUPPORT FOR WITHDRAWAL

On February 12, 2013, NERC filed with FERC a proposed interpretation of BAL-002-1. On May 16, 2013, FERC issued a Notice of Proposed Rulemaking (“BAL Interpretation NOPR”)<sup>2</sup> proposing to remand the proposed interpretation, stating that, “it changes a requirement of the Reliability Standard, thereby exceeding the permissible scope for interpretations.”<sup>3</sup>

Since the issuance of the BAL Interpretation NOPR, NERC developed Reliability Standard BAL-002-2 (*Disturbance Control Performance - Contingency Reserve for Recovery from a Balancing Contingency Event*) to supersede BAL-002-1. Reliability Standard BAL-002-2, which was adopted by the NERC Board of Trustees on November 5, 2015 and filed with this authority on February 18, 2016, obviates the need for the proposed interpretation under pending Reliability Standard BAL-002-1a.

Respectfully submitted,

/s/ Shamai Elstein
