

Standards Committee Nomination Form

2016-2017 Term Elections

The North American Electric Reliability Corporation (NERC) [Standards Committee](#) (SC) has two members from each of the ten industry segments. Each SC member is elected by the segment he or she represents. The SC reports to the NERC Board of Trustees and oversees the development of NERC Reliability Standards by performing tasks governed by the [Standard Processes Manual](#), the [Standards Committee Charter](#), and the [SC Work Plan](#).

Any person may nominate any other person to serve on the SC, with the limitation that the nominee must be employed by or an agent of an entity that is registered in that segment of the [Registered Ballot Body](#) (RBB) of the [Standards Balloting and Commenting System](#). The nominee is not required to be the RBB representative from that organization.

Nominations are currently being accepted for each of the ten segments. Election of representatives is governed by the NERC Rules of Procedure, Appendix 3B: [Procedures for Election of Members of the Standards Committee](#).

You may use this form to nominate candidates for segments 1 through 10. You may submit more than one nomination. Please, however, use one form per nomination. You are welcome to nominate yourself.

Nominee's name and contact information.	
Name	Robert Blohm
Job Title	Managing Director
Organization	Keen Resources Ltd.
Telephone	289 981 8414
Email	Rb112@columbia.edu
Fax	
Mailing Address	850 Clarkson Rd S Mississauga, ON L5J 2V3

Has the nominee been contacted to verify willingness to serve on the SC?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
--	---	-----------------------------

<p>Does the nominee meet the following definition of “Canadian” contained in the NERC Rules of Procedure?</p> <p><i>“Canadian” means one of the following: (a) a company or association incorporated or organized under the laws of Canada, or its designated representative(s) irrespective of nationality; (b) an agency of a federal, provincial, or local government in Canada, or its designated representative(s) irrespective of nationality; or (c) a self-representing individual who is a Canadian citizen residing in Canada.</i></p>	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
--	---	-----------------------------

Person making this nomination (if different from nominee).	
Name	
Organization	
Telephone	
Fax	
Email	
Mailing Address	

Please indicate the industry segment number (1-10) in which the nominee seeks election:
8

Please provide a brief summary of the nominee’s qualifications for this SC position. (The summary should be no longer than a single page of single-spaced text.)

Robert Blohm is an independent electric reliability expert seeking re-election to the Standards Committee to represent the small-consumer segment, having served in that capacity since 2011. He is both a native-born US citizen and a naturalized Canadian citizen holding such dual-citizenship since it was first allowed under the 1996 North American Free Trade Agreement. He has been an active NERC participant for 19 years, representing the small-consumer perspective on economic-efficiency and sound reliability practices. In the small consumer's best interest he has sought to implement the principle of cost-causation whereby the parties whose operations hurt reliability should pay the cost to the parties whose operations help reliability, thereby holding the small consumer harmless from having to pay reliability costs caused by others. After initially participating in NERC’s Market Interface Committee, he has for the last 16 years actively and continuously participated on every frequency-control related NERC task force and drafting team. He is currently a member of the Balancing Authority Reliability-based Controls 2 Periodic Review Team Time-Error-Connection Standard Drafting Team. He served as

a referenced resource for the 2012 Frequency Response Initiative Final Report prepared by NERC's System Analysis and Modeling Subcommittee. From 2000 to 2004 he was a special troubleshooting representative within NERC of NERC president Michehl Gent, including at the Resources Subcommittee. Mr. Blohm also participated in the DOE/Natural Resources Canada public consultations following the 2003 Northeast Blackout on which he was frequently quoted by the New York Times which also published a graph he prepared <http://www.blohm.cnc.net/MyGraphInNYTimes.gif> <http://www.blohm.cnc.net/NYT200803.htm> . He was a member of NERC's Joint Inadvertent Interchange Taskforce, author of "the Blohm formula" for pricing inadvertent interchange in its final 2002 whitepaper posted at http://www.naesb.org/pdf/weq_mos012403w5.pdf , and a member of the subsequent NAESB Inadvertent Interchange Payback Task Force. His NERC and NAESB reliability reports may be found at <http://www.blohm.cnc.net> . He has published on electric reliability in markets, with particular attention to optimizing its cost by aligning incentives--a matter of particular concern to consumers--, in *IEEE Transactions on Power Systems*, *Public Utilities Fortnightly*, *The Wall Street Journal*, and Canada's *Globe and Mail* and *National Post*. He has provided expert testimony for consumer interests in US state public-utility commission hearings. He also advised in the restructuring of both Ontario's and Quebec's electric power industries. Multilingual in the 5 main European languages and in Chinese, he has advised the industry in Europe and the Far East on the basis of his continued North American expertise, thus conforming with the segment 8 membership requirement of having no clients in North America.

Please complete this form no later than **Monday, October 19, 2015** and send to monica.benson@nerc.net.
