

ERO Enterprise IT Application Strategy

Stan Hoptroff, Vice President and Chief Technology Officer
Standards Oversight and Technology Committee Meeting
May 6, 2015

RELIABILITY | ACCOUNTABILITY

- Electric Reliability Organization (ERO) IT Guiding Principles/ERO Applications Update
- Electricity Sector Information Sharing and Analysis Center (ES-ISAC) Technology Update
- Cybersecurity Risk Information Sharing Program (CRISP) Technology Update
- Document Management Business Requirements

- 2015 and 2016 Ongoing Major Initiatives
- Project Management and Reporting
- Priorities Looking Ahead
- Supplemental Information
 - 2017-2018 Ongoing Major Initiatives

- Reach consensus on ERO Enterprise priorities:
 - Event Analysis (EA) application
 - Reliability Assessments application
 - Compliance and Registration
 - Enterprise Reporting and Data Management
- Ensure that the right information is provided to the right people at the right locations
- Ensure consistent, disciplined decision-making process (Technology Leadership Team (TLT) and “gated process”)
- Recognize NERC and Regional-specific IT requirements, business needs, activities, and realities

- Recognize a bias for proven off-the-shelf solutions with minimal modifications or configurations
- Ensure data integrity and data sharing via proven integration techniques
- Conform to the ES-ISAC Code of Conduct
- Ensure important cross sector institutional relationships are respected and nurtured (National Council of ISACs, American Gas Association, etc.)

- Reliability Assessment Data System (RADS-NERC)
 - Development and testing to be completed by 06/30/2015
- Event Analysis (NERC)
 - Configuration and testing to be completed by 07/14/2015
- Enterprise Reporting Phase 1 – Open Access Technology International, Inc. (OATI) Applications ✓
 - Project completed on 03/13/2015
- Enterprise Reporting Phase 2
 - ERO TLT business case review planned for 06/12/2015

- Compliance Monitoring and Enforcement Program (CMEP) Tool Assessment
 - CRATS – Compliance Reporting and Tracking System (NERC)
 - CITS – Compliance Information Tracking System (NPCC, FRCC, SERC)
 - webCDMS – Web Compliance Data Management System (WECC, RF, TRE, SPP, MRO)
 - OATI contract consolidation (webCDMS) – Team formed and addressing issues (e.g., data ownership and draft of “benefited parties” clause completed)
 - Determine reasonable improvement investments in legacy (CRATS) system – Business case approved by TLT on 04/10/2015 and ERO Executive Management Group review on 06/26/2015
 - Determine strategic information management requirements – Q3 2015
 - Potential new vendor(s) RFI/RFP – Q4 2015

- ES-ISAC Information Sharing Portal planned improvements:
 - Development in progress of new portal interfaces and communications with expected completion by 6/1/15
 - Development of additional enhancements for 2015 GridEX III exercise; support targeted to begin 6/1/15
- Office and Systems Separation Effort
 - Construction of separate ES-ISAC offices and computer room under way; systems separation to follow

- Currently, 20 participants enrolled in the program
- Analysis is being performed for 16 of the 20 participants
- Two additional installs to be completed over the next month
- First CRISP Technical Workshop for participants was held on April 21-22, 2015

- Ensures proper classification and management of confidential information
- Addresses a number of internal audit recommendations/
mitigates corporate risk
- Improves information access and search capabilities
- Facilitates working group, team, and stakeholder collaboration
- Supports the document retention policy and procedures

- Simplifies document retrieval
- Improves version control of documents
- Improves workflow control (review and approval of documents)
- Increases efficiency and employee productivity

- New functionality – \$1.9M
 - RADS-NERC – \$530K
 - EA – \$220K
 - Enterprise Reporting – \$500K
 - CRATS (CMEP) Improvements – \$550K
- IT infrastructure – \$1.7M
- Client peripherals – \$1.5M
- Application support – \$1.3M
- Data analytics – \$100K
- Total Budgeted Funds – \$6.6M
- Document Management Program \$663K – Reserve funding required

- New functionality – \$2.3M
 - Legacy Application Replacement – \$500K
 - Document Management – \$650K
 - Enterprise Reporting – \$500K
 - Compliance Reporting & Tracking System (CMEP) Improvements – \$40K
 - Enterprise Application Enhancement (New Solutions) - \$610K
- IT infrastructure – \$1.9M
- Client peripherals – \$1.6M
- Application support – \$1.7M
- Data analytics – \$100K
- Total Projected Budget – \$7.6M

	(\$000's)	
Information Technology Budget	2015	2016
Contracts and Consultants	\$ 1,730	\$ 2,162
Office Costs (maintenance / supplies only)	1,554	1,595
Fixed Asset (Capital) Expenditures	3,319	3,811
Major Initiatives	\$ 6,603	\$ 7,568
Personnel	3,272	3,924
Meetings, Travel and Conferencing Expenses	51	96
Office Costs (excluding maintenance / supplies)	590	645
Total Information Technology Budget	\$ 10,516	\$ 12,233

- Weekly Reporting
 - Current phase (status) – Design, development/test, etc.
 - Condition – Red, yellow, green
 - Planned completion – Planned close date (includes post go-live)
 - Percent compete – Internal PMO estimate
 - Deliverables report – Major milestones and deliverables
 - Risk register – Identified, occurred, avoided, mitigated, assigned
- Tollgate Process
 - Multiple stage gates for progress review with sponsors
 - Code reviews by Enterprise Architect
 - Signoff by sponsors by phase on deliverables at each gate
 - Scope freeze after design phase reduces changes and controls cost
 - Code freeze 30 days prior to go live to ensures application stability

- Complete development for RADS-NERC (Q2 2015)
- Identify business needs for enhanced CMEP tool(s) (Q2 2015)
- Complete configuration for EA solution (Q3 2015)
- Expand the creation of central databases for reporting and analysis (Enterprise Reporting Phase 2 and Phase 3) (Q4 2015)

- Further leverage our xRM platform for consistent client experiences; for example, alerting and registration (Q1 2016)
- Identify ES-ISAC Portal additional features and CRISP enhancements and expansion (Q4 2015)
- Document Management Program – Governance, Design, and Architecture (Q1 2016)

Questions and Answers

2017-2018 Ongoing Major Initiatives - By Year

- New functionality – \$3.1M
 - CMEP application – \$2M
 - Document Management- \$330K
 - Enterprise Reporting - \$300K
 - Enterprise Application Enhancement – \$390K
- IT infrastructure – \$1.9M
- Client peripherals – \$1.6M
- Application support – \$1.7M
- Data analytics – \$200K
- Total – \$8.5M

- New functionality – \$2.2M
 - Enterprise Reporting – \$500K
- IT infrastructure – \$1.4M
- Client peripherals – \$1.6M
- Application support – \$1.7M
- Data analytics – \$200K
- Total – \$7.1M

FAC-003:

Research and Development Results of Gap Factor Verification

Thomas Burgess, Vice President and Director, Reliability Assessment
and Performance Analysis
Standards Oversight and Technology Committee Meeting
May 6, 2015

RELIABILITY | ACCOUNTABILITY

- March 2013 — FAC-003-3 (Order 777) directed testing for Minimum Vegetation Clearance Distances (MVCD)
- July 2013 — Project plan submitted to FERC
- January 2014 — Advisory team assembled and project initiated
- October 2014 — Planned testing completed by NERC and EPRI

- Testing included various tree shapes
 - Vertical grow-in
 - Horizontal blow-in
- Indicates a gap factor of 1.0 may be more appropriate than the present value of 1.3 contained in FAC-003-3
- Actual MVCD may increase
 - Increase varies with system voltage levels
 - Initial findings for increases of clearance distances range from 1' to 3.5'
- Being verified with additional testing

- Various communication tools for preliminary results
 - Webinar (March 25, 2015)
 - Standards and Compliance Workshop (April 1-3, 2015)
 - April 2015 NERC News
 - MRC Info Session (April 2, 2015)
- May 2015 – Advisory Alert with preliminary report and data
- May 2015 – Conclude validation testing
- June 2015 — File NERC report with FERC
- July 2015 – NERC Advisory Alert with final report and data
- July 2015 – Initiate changes to Reliability Standard FAC-003-3

Reliability Standards Quarterly Status Report

Valerie Agnew, Senior Director of Standards
Standards Oversight and Technology Committee Meeting
May 6, 2015

RELIABILITY | ACCOUNTABILITY

	Pre-2013 Directives*	Post 2012 Directives*	Total
Issued prior to year-end 2012	191		
Issued since year-end 2012		52	
Resolved as of March 31, 2015	167	43	
Remaining	24	9	33
Projected to be resolved in 2015	19	6	25
Projected remaining at year-end 2015	5	3	8
*Does not include directives for other NERC departments			

	Current Status	P81 and IERP Recommendations for Retirement
Total*		281
Addressed	238	
In current projects	35	
Not assigned	8	
*Unique requirements		

Resolution	Number	Percent
Retired	110	46%
Modified	103	43%
Retained	25	11%
Total	<u>238</u>	

- February (3)
- May (5 planned; now 3)
- August (4 planned; now 4 plus a directives project)
- November (3 planned; now 5 plus a directives project)
- Early 2016 (2)

Trend for Number of Requirements
