Standards Announcement

Second Ballot Window Open Soon

July 24–August 3, 2010

Available at: <https://standards.nerc.net/CurrentBallots.aspx>

Project 2007-01: Underfrequency Load Shedding

A second ballot window for proposed standards PRC-006-1 — Automatic Underfrequency Load Shedding and EOP-003-1— Load Shedding Plans **will open on Saturday, July 24, 2010** and will remain open **until 8 p.m. Eastern on August 3, 2010**.

Instructions

Members of the ballot pool associated with this project may log in and submit their votes from the following page: <https://standards.nerc.net/CurrentBallots.aspx>

Recirculation Ballot Process

The Standards Committee encourages all members of the ballot pool to review the consideration of comments submitted with the initial ballots and those submitted through the formal comment period. In this second ballot, votes are counted by exception only — if a ballot pool member does not submit a revision to that member's original vote, the vote remains the same as in the first ballot. Members of the ballot pool may:

- Reconsider and change their vote from the first ballot.
- Vote in the second ballot even if they did not vote on the first ballot.
- Take no action if they do not want to change their original vote.

Next Steps

Voting results will be posted and announced after the ballot window closes.

Project Background

Major objectives:

1. Ensure UFLS programs are developed to provide an appropriate level of reliability (not least common denominator).
2. Ensure that the standard is enforceable with clearly defined requirements and unambiguous language.
3. Address the issues raised by FERC Order 693 and other applicable orders.
4. Address the issues raised in the original Standards Authorization Request (SAR) for this project.
5. Address coordination between underfrequency load shedding and generator trip settings during frequency excursions.

The request and interpretation are posted on the project page:

http://www.nerc.com/filez/standards/Underfrequency_Load_Shedding.html

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
