Project 2008-10: Interpretation of CIP-006-1 for Progress Energy

The initial ballot for a revised interpretation of standard CIP-006-1 — Physical Security of Critical Cyber Assets Requirement R1.1 for Progress Energy ended on October 12, 2009.

Ballot Results

Voting statistics are listed below, and the [Ballot Results](#) Web page provides a link to the detailed results:

Quorum: 79.92%

Approval: 74.47%

Since at least one negative ballot included a comment, these results are not final. A second (or recirculation) ballot must be conducted. Ballot criteria are listed at the end of the announcement.

Next Steps

As part of the recirculation ballot process, the drafting team must draft and post responses to voter comments. The drafting team will also determine whether or not to make revisions to the balloted item(s). Should the team decide to make revisions, the revised item(s) will return to the initial ballot phase.

Project Background

Progress Energy asked if Electronic Security Perimeter wiring external to a Physical Security Perimeter must be protected within a six-wall boundary. The team revised the interpretation based on stakeholder comments submitted during the initial ballot for the first draft of the interpretation.

The request and interpretation are posted on the project page:

http://www.nerc.com/filez/standards/Project2008-10_CIP-006_Interpretation_Progress.html

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.

Ballot Criteria

Approval requires both a (1) quorum, which is established by at least 75% of the members of the ballot pool for submitting either an affirmative vote, a negative vote, or an abstention, and (2) A two-thirds majority of the weighted segment votes cast must be affirmative; the number of votes cast is the sum of affirmative and negative votes, excluding abstentions and nonresponses. If there are no negative votes with reasons from the first ballot, the results of the first ballot shall stand. If, however, one or more members submit negative votes with reasons, a second ballot shall be conducted.
