

Standards Announcement Recirculation Ballot Window Open May 26–June 5, 2009

Now available at: <https://standards.nerc.net/CurrentBallots.aspx>

Interpretation of IRO-010-1 for the WECC Reliability Coordination Subcommittee (Project 2009-11)

A recirculation ballot window for an interpretation of IRO-010-1 — Reliability Coordinator Data Specification and Collection, Requirements R1.2 and R3, for the Western Electricity Coordinating Council (WECC) Reliability Coordination Subcommittee is now open **until 8 p.m. EDT on June 5, 2009**.

Project Background

The WECC Reliability Coordination Subcommittee is seeking clarification on 1) the type of data to be supplied to the Reliability Coordinator, 2) which entities are ultimately responsible for ensuring data are provided, and 3) what actions are expected of the Reliability Coordinator regarding a “mutually acceptable format.” The request and interpretation can be found on the project page:

http://www.nerc.com/filez/standards/Project2009-11_Interpretation_IRO-010-1_WECC_RCS.html

Recirculation Ballot Process

The Standards Committee encourages all members of the Ballot Pool to review the consideration of comments submitted with the initial ballots. In the recirculation ballot, votes are counted by exception only — if a Ballot Pool member does not submit a revision to that member’s original vote, the vote remains the same as in the first ballot. Members of the ballot pool may:

- Reconsider and change their vote from the first ballot.
- Vote in the second ballot even if they did not vote on the first ballot.
- Take no action if they do not want to change their original vote.

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
