Initial Ballot Results

Now available at: <https://standards.nerc.net/Ballots.aspx>

Project 2009-28: Interpretation of EOP-001-1 and EOP-001-2 for the Florida Municipal Power Pool (FMPP)

The initial ballot for an interpretation of standard versions EOP-001-1 and EOP-001-2 — Emergency Operations Planning, Requirement R2.2, for FMPP ended on February 22, 2010.

Ballot Results

Voting statistics are listed below, and the [Ballot Results](#) Web page provides a link to the detailed results:

Quorum: 87.36%

Approval: 91.79%

Since at least one negative ballot included a comment, these results are not final. A second (or recirculation) ballot must be conducted. Ballot criteria are listed at the end of the announcement.

Next Steps

As part of the recirculation ballot process, the drafting team must draft and post responses to voter comments. The drafting team will also determine whether or not to make revisions to the balloted item(s). Should the team decide to make revisions, the revised item(s) will return to the initial ballot phase.

Project Background

FMPP is seeking clarification regarding Requirement R2.2. FMPP asked if the Balancing Authority needs to develop a plan to maintain a load-interchange-generation balance during operating emergencies and follow the directives of the Transmission Operator.

The request and interpretation can be found on the project page:

http://www.nerc.com/filez/standards/Project2009-28_EOP-001-1-2_R2.2_FMPP.html

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.

Ballot Criteria

Approval requires both a (1) quorum, which is established by at least 75% of the members of the ballot pool for submitting either an affirmative vote, a negative vote, or an abstention, and (2) A two-thirds majority of the weighted segment votes cast must be affirmative; the number of votes cast is the sum of affirmative and negative votes, excluding abstentions and nonresponses. If there are no negative votes with reasons from the first ballot, the results of the first ballot shall stand. If, however, one or more members submit negative votes with reasons, a second ballot shall be conducted.
