

# Standards Announcement

## Project 2012-05 ATC Revisions Standard Drafting Team

**Nomination Period Open through July 22, 2013**

[Link to Official Nomination Form](#)

[Link to Word Version of Nomination Form](#)

### Background

The purpose of this project is: (1) to ensure the reliable calculation of Total Flowgate Capability (TFC) and Total Transfer Capability (TTC) values when those values are used by a Transmission Service Provider to calculate Available Flowgate Capability (AFC) or Available Transfer Capability (ATC) or used by a Reliability Coordinator; (2) to require disclosure of how TFC, TTC, Capacity Benefit Margin (CBM), and Transmission Reliability Margin (TRM) values are calculated for entities with a reliability need for the information; and (3) to require the sharing of data with other entities with a reliability need for the AFC, ATC, TFC, TTC, CBM, or TRM values.

We are seeking three individuals who have experience and expertise in the aforementioned areas. If possible, we would like to add a member from Canada. We are also seeking a lawyer to participate on the team.

Experience with developing standards inside or outside (e.g., IEEE, NAESB, ANSI, etc.) of the NERC process is beneficial, but is not required, and should be highlighted in the information submitted if applicable.

### Instructions for Submitting a Nomination

If you are interested in serving on the Standard Drafting Team, please complete this nomination form by **July 22, 2013**. The nomination form should be submitted describing the individual's experience or qualifications related to the project.

An unofficial Word version of the nomination form is also posted on the [Standard Drafting Team Vacancies](#) page.

**Standards Development Process**

The [Standards Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
