Technology Update –

The Centralized Organization Registration ERO System ([CORES](#)) Technology Project is progressing according to plan and is scheduled to launch in June 2019. A FAQ document has been posted to the site.

CORES (which combines the registration functions currently managed in OATI – webCDMS, Guidance – CITS, and CRATS into a consolidated registration system) is anticipated to be launched the week of June 17th, 2019, with multiple training opportunities to be provided by the ERO. If you would like more information about the project, please contact [Ryan Stewart](#), Senior Manager of Registration and Certification.

For more information or assistance, please contact nerc.registration@nerc.net.
