

Comments from Dominion Energy regarding Proposed transfer request by Wisconsin Public Service Corporation (“WPSC”) and Upper Michigan Energy Resources Corporation (“UMERC”)

Received on MAY 7, 2018

“Dominion Energy supports the Section 1208 request of Wisconsin Public Service Corporation and Upper Michigan Energy Resources Corporation from the Midwest Reliability Organization (MRO) to Reliability First (RF) and appreciates the transparency and diligence in comprehensively stating the facts and explaining the analysis supporting the request. RF appears to have taken the information provided by the requesting entities, augmented it with additional pertinent information, performed a detailed analysis of the request applying the criteria specified in the NERC Rules of Procedure, and arrived at a well-supported conclusion supporting the approval of the request.

RF examines each of the six (6) criteria established under section 1208 of the NERC Rules of Procedure and discusses the evidence applicable to each criterion. The analysis of the evidence as it applies to each criterion is clear and concise and supports the conclusions made by RF.

Dominion Energy appreciates the diligence and effort made by all of the involved entities to provide transparency and follow the process established by the NERC Rules of Procedure.”
