

CIP Version 5 FAQs – Consolidated FAQs and Answers

Standard Reference	Question	Answer	Number
		crushing are two of many ways to destroy media. Other methods include, but are not limited to, multi-pass wiping, drilling of platters, shredding, etc. In some cases, two or more methods could be used to ensure data destruction. The Guidelines and Technical Basis offer suggestions on how the destruction can be performed, including information from NIST SP800-88.
