Re: *North American Electric Reliability Corporation*

Dear Ms. Young:

The North American Electric Reliability Corporation (“NERC”) hereby submits errata to the proposed defined terms and Violation Severity Levels (“VSLs”) associated with version 5 of the Critical Infrastructure Protection Reliability Standards (“CIP Version 5”). NERC submitted its filing of proposed CIP Version 5 on February 7, 2013.

NERC is hereby submitting errata changes to: (1) replace the term “intermediate devices” with “Intermediate Systems,” which is a defined term, in the definitions for Electronic Access Control or Monitoring Systems (“EACMS”) and Interactive Remote Access; and (2) correct typographical errors in the VSLs. Attachment 1 hereto contains clean and redline versions of Exhibit A(2) of the Filing – Associated Modifications to the Glossary of Terms used in NERC Reliability Standards – to correct the definitions of EACMS and Interactive Remote Access; Attachment 2 contains clean and redline versions of proposed CIP-002-5.1 to correct the definition of EACMS provided in the background section of the proposed standard; and Attachment 3 contains clean and redline versions of CIP-004-5.1 to correct a typographical error in the proposed VSLs assigned to CIP-004-5, Requirement R4, part 4.2.

Should you have any questions, do not hesitate to contact the undersigned.
