

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

Transmission Relay Loadability Reliability Standard

Docket No. RM08-13-001

NOTICE OF EXTENSION OF TIME

(February 15, 2012)

On November 22, 2011, the North American Electric Reliability Corporation (NERC) filed a motion for a two-year extension of time, until September 30, 2014, to address the directive in the Commission's Order No.733¹ to develop a new generator relay loadability standard, in accordance with NERC's Reliability Standards Development Plan 2012-2014 (Project). NERC states that based on its adopted prioritization tool, the Project was not identified as a high priority project in the prioritization analysis and requests that the Project be postponed in order to focus industry resources on projects that have higher overall reliability impact.

Upon consideration, notice is hereby given that NERC is granted a one-year extension of time to and including September 30, 2013 to complete the Project pursuant to the Commission's Order No. 733.

Kimberly D. Bose,
Secretary.
