

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

Frequency Response Metrics to Assess Requirements Docket No. AD11-8-000
for Reliable Integration of Variable Renewable
Generation

NOTICE OF EXTENSION OF TIME

(February 18, 2011)

On February 11, 2011 and February 15, 2011, the American Wind Energy Association (AWEA) and the Edison Electric Institute and the Electric Power Supply Association (the Associations) filed respective motions for an extension of time to file comments in response to the Commission's Notice Inviting Comments on Report issued January 20, 2011, in the above-referenced proceeding.¹ In its motion, AWEA states that additional time is needed to evaluate and to provide fully-developed comments on the Lawrence Berkeley National Laboratory (LBL) report which is the subject of the January 20 Notice. The Associations state that because the LBL report raises complex and intricate issues, additional time is needed to submit a responsive filing.

Upon consideration, notice is hereby given that an extension of time for filing comments on the LBL report is granted to and including May 6, 2011.

Nathaniel J. Davis, Sr.,
Deputy Secretary.
