

**UNITED STATES OF AMERICA
BEFORE THE
FEDERAL ENERGY REGULATORY COMMISSION**

Holland, Michigan Board of Public Works

Docket No. RC11-5-000

**RESPONSE TO REQUEST FOR PRODUCTION OF DOCUMENT AND REQUEST
FOR CONFIDENTIAL TREATMENT**

The North American Electric Reliability Corporation (“NERC”) hereby submits two privileged and confidential attachments also containing critical energy infrastructure information in response to the request made by the City of Holland (“Holland”) in this proceeding on November 17, 2011. The attachments consist of the Michigan Electric Transmission Company, LLC (“METC”) system restoration procedures/plan (“SRP”). Attachment A is the version of the SRP updated on February 1, 2008. Attachment B is what NERC understands to be the currently effective SRP. The information referenced by Reliability *First* Corporation in its Assessment and Brief in Opposition to Holland Board of Public Works’ Appeal of TO and TOP Registration (Exh. HOL-11 P. 8), which appears in Appendix B of the SRP, appears to be identical in both versions of the SRP. Both versions are being provided to ensure the completeness of the record.

At METC’s request, NERC is submitting these attachments under seal. Attachment A and B include non-public, privileged and confidential information as well as information regarding critical energy infrastructure as defined by the Commission’s regulations at 18 C.F.R. Part 388 and orders, as well as NERC Rules of Procedure. In accordance with the Commission’s Procedural Rules, and in particular 18 C.F.R. § 388.112, a non-public version of the information redacted from the public filing is being provided under separate cover. Because the information in the attached documents is deemed “confidential” by NERC, Registered Entities and Regional

Entities, NERC requests that the confidential, non-public information be provided special treatment in accordance with the above regulation.

Respectfully submitted,

Gerald W. Cauley
President and Chief Executive Officer
North American Electric Reliability Corporation
