Q3

Briefly describe the nominee's experience and qualifications to serve on the RISC:

I am currently the General Manager of APS's Regulatory Affairs and Compliance. I have responsibility for both the federal and state regulatory obligations. I am very excited to bring both my regulatory experience and operations expertise to the industry as we move forward on achieving a 100% carbon free electric system.

I previously led the organizations responsible for operating and maintaining the APS transmission system. My responsibilities included the Transmission Operator and Balancing Authority function. In addition, I led the APS team responsible for developing and implementing an industry leading transmission and substation maintenance program.

My journey with APS began in 2014, when I joined APS NERC Regulatory Compliance team. Within six months, I took on the manager role for the NERC Regulatory Compliance group. Before coming to APS, I worked at Salt River Project in various operations roles.

I hold a Bachelor of Science degree in Electrical Engineering from Arizona State University and am a registered professional engineer in Arizona.
