

Standards Announcement

Project 2007-11 Disturbance Monitoring Standard Drafting Team

Nomination Period Open through April 25, 2013

[Link to Official Nomination Form](#)

[Link to Word Version of Nomination Form](#)

Background

The purpose of this project is to establish requirements for recording and reporting sequence of events (SOE) data, fault recording (FR) data, and dynamic disturbance recording (DDR) data to facilitate analysis of Disturbances.

We are seeking two individuals who have experience and expertise with disturbance monitoring or power system operations. If possible, we would like to add a member from the RFC Region and Canada.

We are also seeking a lawyer to participate on the team.

Experience with developing standards inside or outside (e.g., IEEE, NAESB, ANSI, etc.) of the NERC process is beneficial, but is not required, and should be highlighted in the information submitted if applicable.

Instructions for Submitting a Nomination

If you are interested in serving on the Standard Drafting Team, please complete this nomination form by **April 25, 2013**. The nomination form should be submitted describing the individual's experience or qualifications related to the project.

An unofficial Word version of the nomination form is also posted on the [Standard Drafting Team Vacancies](#) page.

Standards Process

The [Reliability Standards Development Plan](#) explains NERC's work plan for standards development in 2013 and beyond, and the [Standard Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our gratitude to all those who participate.
