<b>Comment Period Open for Application Guide for Modeling Turbine-</b> <b>Governor and Active Power Frequency Controls in Stability Studies</b> <b>Draft Reliability Guideline:</b> The NERC Power Plant Modeling and Verification Task Force (PPMVTF) developed the <u>draft Reliability</u> <u>Guideline</u> to address potential issues in stability and primary frequency response simulations that can arise from application of turbine-governor models. The guideline provides recommended modeling practices to address turbine-governor model fidelity issues, including parameterization, deadband modeling, and modeling of non-responsive units. The guidance is intended to clarify key aspects of how turbine-governor models are applied in an effort to improve the accuracy of interconnection-wide simulations. The guideline is primarily intended for Generator Owners (GOs), Generator Operators (GOPs), Transmission Planners (TPs), Planning Coordinators (PCs), and power plant modelers. The NERC Planning Committee (PC) reviewed the draft guideline and authorized posting for industry comment.	Submit comments <u>via email</u> using the <u>comment form</u> .	03/11/19	04/26/19

### **GENERAL COMPLIANCE AND ENFORCEMENT NEWS**

#### **NEW Compliance Guidance Update**

There is one new CMEP Practice Guide, <u>BES Cyber System Information</u>, posted on the <u>Compliance Guidance page</u>. The practice guide provides guidance to ERO Enterprise CMEP staff when assessing a registered entity's process to authorize access to designated storage locations for BES Cyber System Information (BCSI) pursuant to CIP-004-6 Requirement R4, and any access controls the registered entity implemented as part of its CIP-011-2 Requirement R1 procedure(s).

This practice guide outlines aspects that CMEP staff should consider in

understanding how a registered entity has applied access controls to mitigate the reliability risk associated with accessing BCSI. This risk information can be used to inform CMEP staff's understanding of a registered entity's security posture and commensurate Compliance Oversight (i.e., Compliance Oversight Plan, audit approach, etc.). CMEP staff shall make compliance determinations based on individual registered entity specific facts and circumstances and the language of the requirements. This practice guide does not supersede or change any language contained in a standard.
